Education

BSc (Hons) in Computer Science, University of Manchester Science Sept 2024 - May 2027

- **Relevant Courses:** Software Engineering, Data Structures & Algorithms, Object-oriented Design & Programming, Introduction to Data Science and Artificial Intelligence, Computer Architecture

- 1st year weighted overall: 2:1

CAIE A Levels, Sunway College, Malaysia

Jan 2023 - June 2024

- 3A* in Chemistry, Mathematics and Further Mathematics
- A in Physics (As Level)

Experience

Hardware Engineer Intern, ServerOn Sdn Bhd - Kuala Lumpur, Malaysia June 2025 - Aug 2025

- Installed and configured Linux, Windows Server, and Proxmox VE on physical servers, handling BIOS setup, disk partitioning, RAID configuration, and network provisioning for deployment readiness
- Assembled and configured servers with hardware testing, cable management, BIOS setup, and BMC/IPMI for remote monitoring and deployment readiness
- Assisted in deploying **software-defined storage (SDS)** using XSKY, performing limit testing across multiple scenarios to evaluate resilience and failover behavior

Event Coordinator Part Time, Diva Production - Kuala Lumpur, Malaysia

Dec 2022 - Aug 2024

- Lead a team of 40 crew for Louis Vuitton KL Pavilion's grand opening with house ambassador Jackson Wang.
- Drove the seamless flow of big events with companies such as Dior, Coach, Clé de Peau Beauté, Omega, Longchamp, and others.
- Prepared events presentation slides using PowerPoint

Office Clerk Intern, Senang Enterprise - Kuala Lumpur, Malaysia

Dec 2022 - Feb 2023

- Handled daily administrative duties including data entry, document formatting, and internal filing systems
- Managed email and phone correspondence, ensuring timely communication with clients and internal teams
- Supported the HR and finance teams by processing staff claims, attendance records, and basic documentation

Projects

Recipe-sharing web application

[github](#)

- Engineered a responsive full-stack web application enabling user-generated recipe content with end-to-end CRUD functionality
- Designed and developed dynamic UI components with category-based filtering and search capabilities
- Built and exposed RESTful API endpoints using Django REST Framework (DRF) with a relational database (e.g. SQLite/PostgreSQL) for persistent data storage
- Tools Used: Django, HTML with CSS and JavaScript

MU0 CPU Implementation

- Designed and implemented the MU0 simple CPU architecture using Verilog HDL
- Developed components such as the ALU, control unit, and register file, simulating instruction fetch-decode-execute cycles

Skills

Programming : Python, Java, Node.js, JavaScript, Assembly, HTML, CSS, Django, Jupyter-Notebook

Languages: English, Chinese Mandarin, Cantonese, Malay
